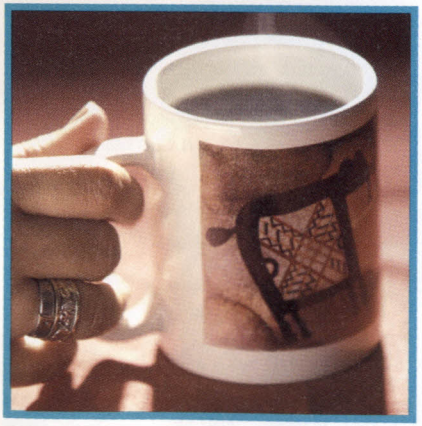
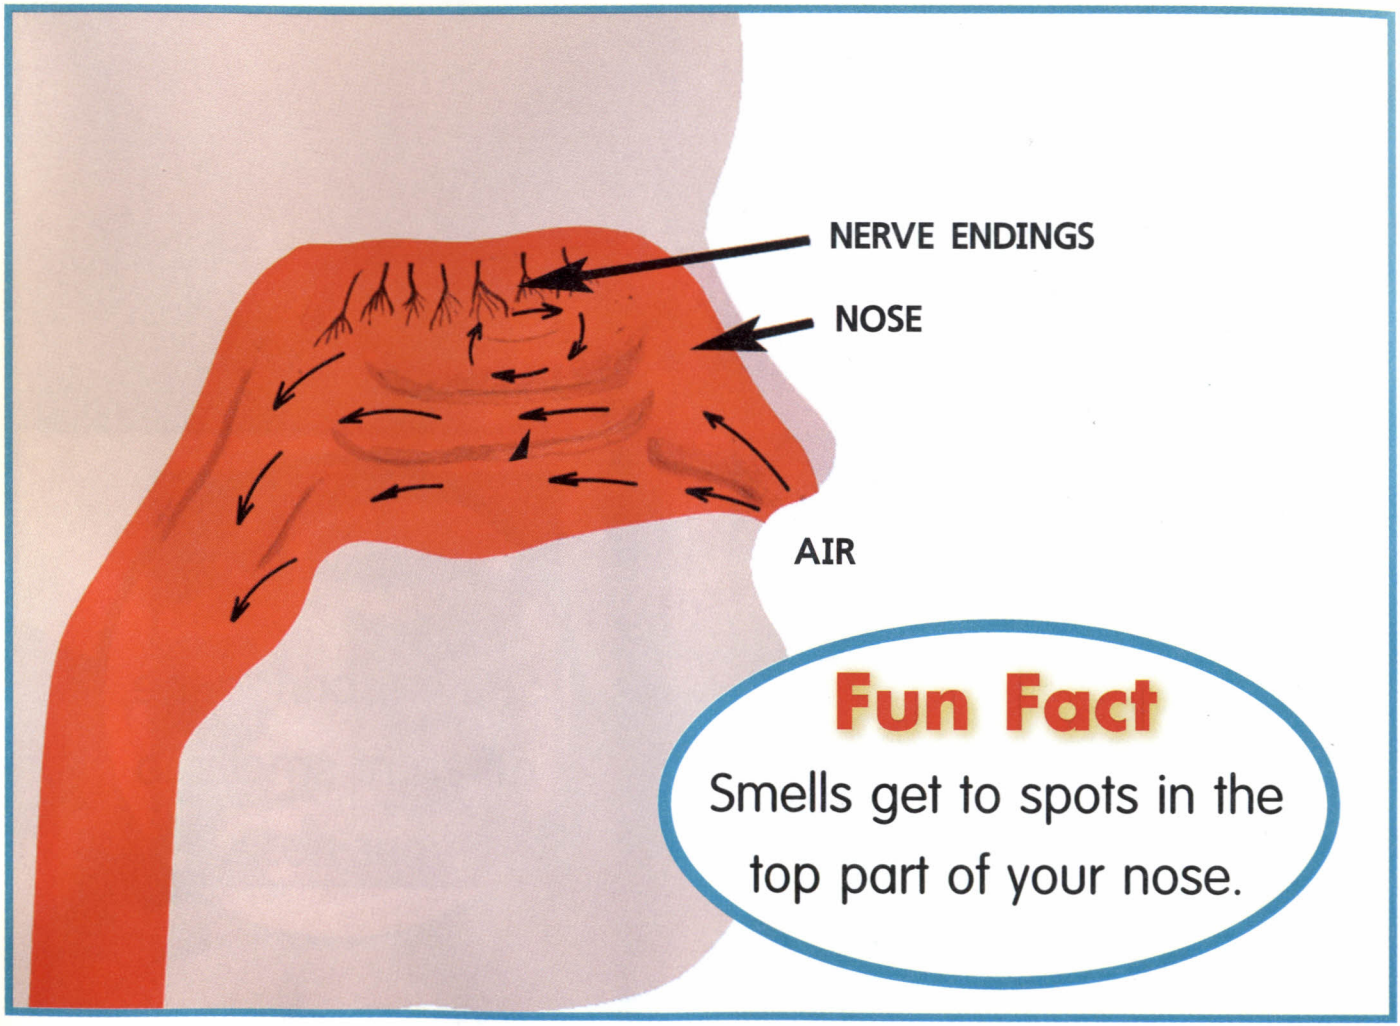
You smell with your nose.



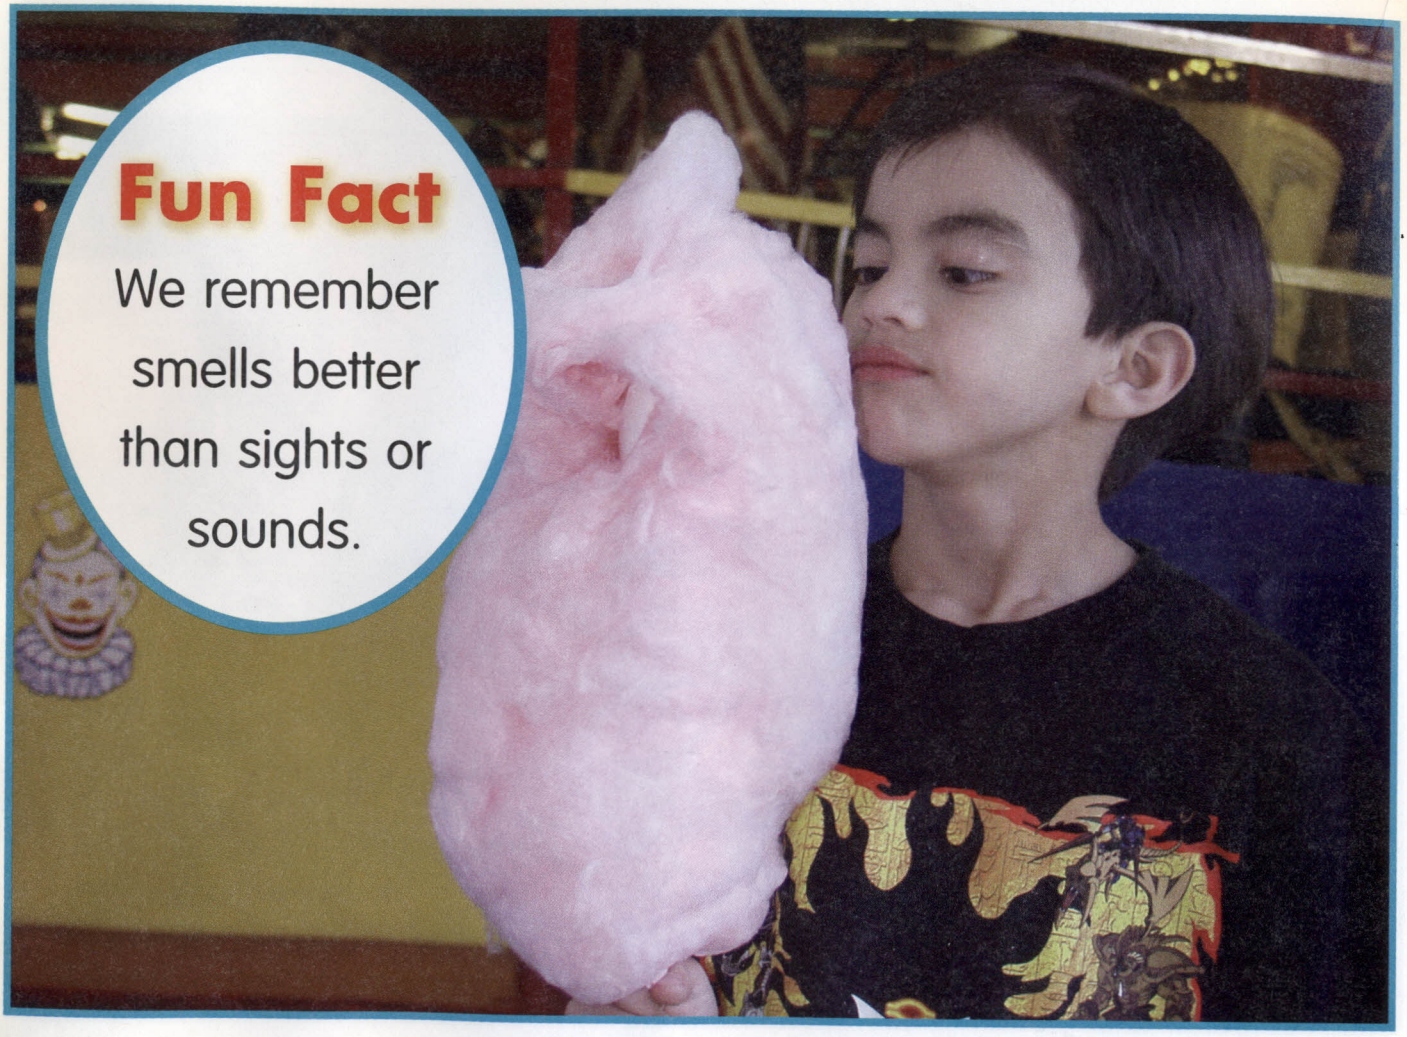
Different things have different smells.

Smells go through the air.



Smells get into your nose.

You know what the smells are.



Some smells are good.

Some smells are bad.

Sometimes you can smell many things at the same time.

Sometimes it's hard to smell anything.

Some things have strong smells.

Some things have weak smells.

Smell and taste work together.

Smell and sight work together.

Your nose knows!
